## The hidden side of the Rigi

## By ship from Luzern to Küssnacht and the "Hohle Gasse"

Küssnacht am Rigi lies centrally located at the northern foot of the impressive Rigi mountain. This historic town, in the heart of Switzerland, is the gateway to a beautiful recreation area. Küssnacht and its surroundings are easily accessible by rail, ship or automobile.

Why not leave from Luzern by ship at 10:00 or 14:00 o'clock? The pleasant journey of about one hour on the Vierwaldstättersee takes you through a beautiful landscape with views of historic castles. On your arrival in Küssnacht you might consider lunch at one of the many garden restaurants on the shore or in the village.

There are various excursions to choose from...

... visit the "Hohle Gasse" with a stroll (about 30 minutes) via the Tellernweg to the Gesslerburg, a historically significant castle. You will walk in the footsteps of the German writer Friedrich Schiller, through a piece of Swiss history.

... take the cablecar from Küssnacht to Seebodenalp at the northern side of the Rigi mountain. From Seebodenalp there are hikes on well maintained and signposted paths. The alpine flora is impressive, and the views over the lake and mountains are guaranteed to please.

... or visit the adventure park for an aerial adventure. The "Seilpark Rigi" is laid out in a site of approx 3.5 square kilometres and offers 6 aerial routes at different levels of difficulty. The ropeways provide an adventure in a natural setting.

### Prices per person
